Kervintz Noel

Enterprise Applications Engineer | Application Support & Integrations
| iManage · Aderant Expert · AWS · Datadog | Legal & Enterprise
Environments
Greater Boston

Summary

Enterprise Applications Engineer with 7+ years supporting mission-critical systems in legal and enterprise environments. Deep hands-on experience with iManage Work, Aderant Expert, CompuLaw, CPi, and IPDAS — core systems powering law firm operations including document management, billing, docketing, and IP management — with direct experience across multi-office firms including Brown Rudnick LLP and Hamilton Brook Smith Reynolds. My background spans the full application support lifecycle: administering document management systems, managing cross-system integrations, performing root cause analysis on complex application issues, coordinating with vendors for escalations and patch management, and creating documentation that reduces recurring incidents. I understand how attorneys, paralegals, and administrative staff depend on these systems daily, and I take that reliability seriously. More recently at Liberty Mutual Insurance, I expanded my technical depth — managing and evolving Datadog monitoring strategies across enterprise application suites, contributing to API integrations using AWS Lambda and API Gateway, authoring infrastructure restoration runbooks, and migrating CI/CD pipelines from Bamboo to GitHub Actions. This work sharpened my ability to think about application reliability, observability, and incident response at scale. I'm open to Enterprise Applications Engineer, Application Support Engineer, and SRE roles in legal, financial, or enterprise environments where deep systems knowledge and engineering fundamentals both matter. Core systems: iManage Work · Aderant Expert · CompuLaw (Vision) · CPi · IPDAS · Intapp Open/Flow · Intapp Wall Builder · Microsoft 365 · Citrix · Active Directory · Datadog · BigPanda · AWS Lambda · API Gateway · SQL · Python

Experience

Liberty Mutual Insurance

3 years 1 month

Technology Associate

January 2023 - June 2025 (2 years 6 months)

Boston, MA

- Managed and evolved Datadog monitoring across enterprise applications, including synthetic checks, performance indexing (SPI), and tiered alerting through Slack, BigPanda, and ServiceNow — enabling proactive detection before user impact.
- Contributed to backend services and API integrations (AWS Lambda, API Gateway) exposing system ownership and operational data, enabling faster root cause analysis during production incidents.
- Developed a diagnostic GET endpoint integrated with AWS API Gateway to investigate 403/500/503 errors in a production incident forwarding system, supporting incident resolution workflows.
- Authored an infrastructure restoration runbook covering VM recovery, database restoration, and post-restoration validation — providing admins a clear step-by-step guide for 24/7 incident response.
- Performed BigPanda alert correlation analysis to improve alert quality and reduce noise through refined correlation rules and exclusion filters.
- Resolved Python linting violations using ruff, integrating static analysis into CI/CD build pipelines across all environments with full pytest/tox validation.
- Built pytest test suites (monkeypatch, mocker, conftest.py) for AWS Lambda authorizer functions covering success paths, invalid tokens, missing claims, and exception handling.
- Migrated CI/CD pipelines from Bamboo to GitHub Actions; led Python runtime upgrade (3.11.9 to 3.12.4) coordinating dependency updates and end-to-end validation.

Cyber Security Analyst Intern

June 2022 - December 2022 (7 months)

- Led an internal tooling initiative to replace a shared Excel document used for mergers and acquisitions tracking — a file causing concurrent access conflicts, data loss, and stakeholder lockouts.
- Analyzed the document structure, identified repeating sections, and proposed converting the data to JSON and rebuilding the interface as a React application for multi-user access.
- Drafted a wireframe, presented the solution to stakeholders including managers, the product owner, and cross-functional teams, and received approval to proceed with full implementation.

- Delivered the React-based M&A tracking tool, eliminating concurrent access issues and making information reliably accessible to all stakeholders.
- Created and configured Jira boards to allow other teams to submit and track tickets, improving cross-team request visibility and workflow management

Hack.Diversity

Software Engineer Fellow

January 2022 - August 2022 (8 months)

Boston, MA

- Developed a React application enabling physicians to submit structured radiology reports for COVID-19 patients, collaborating in a 9-person engineering team using agile practices.
- Built a REST API endpoint supporting patient record updates; participated in weekly sprint reviews and code walkthroughs.

Brown Rudnick LLP

User Support Specialist

June 2019 - November 2021 (2 years 6 months)

Boston, MA

- Administered iManage Work document management system across 6 offices (Boston, New York, Miami, Hartford, London, Paris) including workspace permissions, document recovery, Citrix Echo/Portable directory management, and user access configuration.
- Provided tier 2/3 escalation support for legal enterprise applications including iManage Work, Aderant Expert, CompuLaw (Vision docketing), CPI, IPDAS, Intapp Open/Flow, Intapp Wall Builder, and Exchange/Citrix.
- Managed cross-system integrations including nightly Aderant Expert-to-CompuLaw data synchronization, automated iManage workspace provisioning, and Vision Sync configuration connecting CompuLaw timekeepers to Outlook calendaring.
- Performed root cause analysis on document access failures, permission breakdowns, workspace conflicts, and Outlook/iManage integration issues; implemented corrective actions and documented resolutions to reduce recurring ticket volume.
- Managed user roles, permissions, and security configurations across Active Directory, iManage, and Citrix; coordinated with vendors (iManage, Intapp, CompuLaw) for issue escalation and patch management.
- Created comprehensive knowledge base documentation and troubleshooting guides covering iManage, Citrix, and CompuLaw, improving team efficiency and reducing escalation rates.

- Acted as liaison between end users, internal IT teams, and third-party vendors to facilitate application issue resolution, system enhancements, and workflow improvements.

Massachusetts College of Art and Design

Desktop Support Analyst

September 2018 - May 2019 (9 months)

Greater Boston

- Deployed and supported Windows and macOS devices for faculty, staff, and computer labs; imaged and configured 100+ laptops and workstations.
- Managed Group Policy and Windows 10 migration efforts; collaborated with team members on image deployment for Windows 7 to 10 migration.
- Used PDQ Deploy and PDQ Inventory for software deployment and hardware/software asset management across the domain.
- Assisted students, faculty, and staff with Wi-Fi connection issues on Apple, Android, and Windows devices.

Hamilton, Brook, Smith & Reynolds, P.C.

IT Support Specialist

September 2016 - January 2018 (1 year 5 months)

Concord, MA

- Supported iManage document management system and Microsoft Exchange in a legal environment specializing in intellectual property; troubleshoot document workflows, workspace permissions, and application access issues.
- Coordinated with HR and department managers for new user account creation in Active Directory and MS Exchange.
- Provided deskside and remote support for Microsoft Office applications; followed up with staff and end users on open tickets to ensure timely resolution.
- Updated IS department procedures manual and end-user documentation when procedures changed or new items were added.
- Built and deployed PCs using SCCM; supported basic network troubleshooting and Exchange 2010 administration.

Guide IT

Desktop Support Technician - Contractor

February 2016 - July 2016 (6 months)

DentaQuest, Charlestown

- Deployed software to onsite and remote users via Altiris deployment console; managed BitLocker, PXE boot imaging, and Windows 7 migrations.

- Set, reset, and unlocked user accounts in Active Directory; configured network printers and provided end-user training on secure print and VPN technology.

William James College

Helpdesk Support Specialist | Contractor

February 2015 - May 2015 (4 months)

Newton, MA

- Provided helpdesk support in-person and remotely using LogMeIn Rescue; documented and tracked tickets in the helpdesk support system.
- Managed Active Directory user accounts; supported software, hardware, network printers, and mobile devices.

Go2IT Group

Computer Support Contractor

March 2013 - October 2014 (1 year 8 months)

Greater Boston Area

- Installed and relocated workstations; performed OS upgrades from Windows XP/Vista to Windows 7.
- Performed Active Directory tasks including user account creation, password resets, and account management.

Experian Boston

Computer Support | Dell Contractor

December 2012 - March 2013 (4 months)

Greater Boston

- Provided technical assistance for workstation installations and Windows XP to Windows 7 migrations; supported mobile devices and performed Active Directory account management.

Education

Boston University

Bachelor of Science - BS, Computer Science · (August 2021 - August 2023)

Treehouse

Full Stack JavaScript, Computer Software Engineering · (February 2020 - February 2021)

General Assembly

Certificate, Front End Web Development · (2018 - 2019)

Bunker Hill Community College

Associate of Science (A.S.), Database Programming And
Administration · (2015 - June 2018)

Ecole Supérieure d'Infotronique d'Haiti

Associate's degree, Computer Science
